

Fossil Hunter

Fossils can tell us a great deal about the plants and animals (organisms) that lived many years ago.

For any remains to be considered a fossil, scientists have decided they have to be more than 10,000 years old!

Imagine you are a Fossil Hunter. You will need to examine the fossil images displayed around the round and think carefully about what you might learn from them.

What do you think the lossii might have been? What might lossii numes learn about the past from this lossi? C C F G H	los o o o	What do you think the feedil might have been?	What might food! hunters looks about the most from this food!?
